

Oarfish™

B-One

Organoclay

B-One is an organically modified bentonite used as a gelling and viscosifying agent for primarily diesel-based drilling fluids but also functions effectively in synthetic oil-based fluids.

Advantages

- Capable of being used in the 2-10 lb/bbl (5.7-28.5 kg/m³) range
- Shows faster yield

Technical Specifications

Product	B-One
Properties	Specification
Appearance	Finely-divided off-white powder
Specific Gravity (H₂O=1)	1.6 - 1.8
Bulk Density (kg/m₃)	800 - 900
Odor	Odorless or slight odor of fatty acid
Grain Size (% min. through 200 mesh)	95
Moisture	2 - 5%
Solubility	Oil dispersible; insoluble in water
