

CETCO PROCESS EQUIPMENT

CPI Oil Water Separators

Primary Treatment

The Corrugated Plate Interceptor (CPI) engineered and manufactured by CETCO Process Equipment fulfills all of the prerequisites necessary for oil, water and solids separation from wastewater or produced water streams.

With its combination of removal efficiency, maintainability and durability, the CPI Separator remains a preferred technology for oil, water and solids separation.

Applications

- Oil water separation in petroleum refineries, platforms, industrial wastewaters and chemical plants
- Treats ship or terminal bilge and ballast water
- Oil removal from environmental remediation

Features & Benefits

- High performance and reliability
- No moving parts and fully customizable design
- Standard models to 103,000 BHPD/3,000 GPM
- API 421 design and ASME Code vessel available
