

CETCO's Line Heater provides an economical means of increasing process temperatures to aid in the separation process; decreases possibility of hydrate formation; and, mechanical failure due to MDMT of components. Line heaters are equipped with all API 14C safety devices.

Technical Specifications

Equipment	15K Line Heater
Skid Dimensions (L x W x D)	24' x 8' x 11'
Operating Weight (lbs.)	49,500
Dry Weight (lbs.)	29,800
Vessel size	60" O.D. x 15'
Capacity (MBTU/hr)	2
Number of Passes	10 Upstream / 8 Downstream
Gate Valves: Inlet, Outlet, By-Pass	2 9/16"
Choke Details	2 9/16" Body with 2" Seat
Maximum Operating Pressure (psi)	15,000
Inlet and Outlet Flange (psi)	15,000
Coded Vessel	ASME B31.3, NACE MR0175
API 14C Compliant	Flame Arrested Burner, Stack Arrestor, Bath High Temperature Sensor, Stack High Temperature Sensor, Burner Safety Low
